Pre-Enrollment Forms

Thank you for your interest in Children's Corner! The following are the required pre-enrollment forms that must be completed before your child's first day at Children's Corner. Please take your time to fill these out carefully and be sure to let us know if you have any questions. This information is important to maintain the safety and health of your child.
We look forward to providing your family with exceptional childcare services!

Respectfully,

Steph Najemy

Dear Physician: _____
(Child's Name)
is enrolled in an early childhood program licensed by the Department of Early Education and Care. The Department of Early Education and Care's regulations require at the time of admission a written statement from a physician as evidence of each child's annual physical examination, immunizations and lead screening in accordance with Department of Public Health's recommended schedules. A prompt response is appreciated.

Evidence of a physical exam is valid for one year from the date the child was examined and must be renewed annually thereafter.

SAMPLE

Oral Health Non-Participation Form

In January 2010, EEC issued new regulations for child care programs that include a requirement that educators assist children with brushing their teeth if children are in care for more than four hours or if children have a meal while in care [606 CMR 7.11(11)(d]. This regulation is intended to:

- Help children learn about the importance of good oral health
- Provide information and resources regarding good oral health to child care programs and families
- Help address the high incidence of tooth decay among young children in Massachusetts, which is associated with numerous health risks.

EEC licensed programs must comply with this regulation. However, parents may choose that their child (ren) not participate in tooth brushing while present at the child care program.

You do not need to fill out this form to have your child (ren) participate in tooth brushing while they are in child care. However, if you do not want your child to brush his or her teeth while s/he is attending the child care program, please fill out the information found below. A separate form must be filled out for each child in care. This form must be renewed annually and will be kept in your child's record at the program. Should you change your mind and wish for your child to participate in tooth brushing, this form may be withdrawn at any time by requesting in writing that it be removed from your child's file. Thank you.

I do not wish to have my child participate in tooth brushing while in care at

Children's Corner Child Care Center

Administering Medication

Dear Parents:

With concerns about medication and the children's safety , the Massachusetts Department of Early Education and Care (EEC) recently adopted a new revised regulation about administering medication to children in child care setting, number 606 CMR 7.11 (1) (b) and 7.11 (2) (a-l).

Effective January 2010, all the following steps for administering medication will be followed without exceptions.

Prescription Medication

- Prescription medication must be brought to school in its **original container** and **includes** the **child's name**, **the name of the medication**, **the dosage**, **the number of times per and the number of days the medication is to be administered.** This prescription label will be accepted as the written authorization of the physician.

- The center **will not administer any medication contrary to the directions on the label** unless so authorized by written order by the child's physician.

- The parents must fill out the **Authorization for Medication Form** before the medication can be administered.

Non-prescription Medication

- Non-prescription medication will be given **only with written consent of the child's physician.** The center **will accept a signed statement from the physician listing the medication(s), the dosage and criteria for its administration.** This statement will be valid for one year from the date that it was signed.

- Along with written consent of the physician, the center will also need written parental authorization. The parent must fill out the **Authorization for Medication form**, which allows the center to administer the non-prescription medication in accordance with

the written order of the physician. The statement will be valid for one year from the date it was signed.

- The center will make every attempt to contact the parent prior to the child receiving the non-prescription medication unless the child needs medication urgently or when contacting the parent will delay appropriate care unreasonably.

Topical Ointments and Sprays

- Topical ointments and sprays such as petroleum jelly, sunscreen and bug spray, etc. will be administered to the child with written parental permission. The signed statement from the parent will be valid for one year and include a list of topical non-prescription medication.
- When topical ointments and sprays are applied to **wounds, rashes,** or **broken skin,** the Center will follow its written procedure for **non-prescription** medication which includes the **written order of the physician**, which is valid for a year, and the **Authorization for Medication form signed by the parent.**

All Medications

- **The first dosage must be administered by the parent at home in case of an allergic reaction.**
- All medications **must be given to the teacher directly** by the parent.
- All **unused** medication **will be returned** to the parent.

Chronic Medical Conditions

- **Prior** to administering any medication for a **chronic condition,** such as **Asthma, blood glucose injections,** etc... **All staff must have successfully completed training given by the child's health care practitioner or with his / her written consent, given by the child's parent or the program's health care consultant** that specifically addresses the child's medical condition, medication and other treatment needs.

Please sign here to acknowledge that you have read this note regarding the newly adopted revised regulation regarding administering medication in child care setting.
